Clinical Applications of Echocardiographic Techniques in Cardiovascular Diagnostics

Message from the Guest Editors

Echocardiography is a fundamental modality in the field of cardiovascular diagnostics. The technique has undergone a significant evolution, transitioning from its initial use for basic anatomical assessment to its current role as an advanced modality for detailed functional, mechanical, and hemodynamic evaluation. This progression has been driven by continuous technological innovation that has changed diagnostic and therapeutic pathways in cardiology. This Special Issue will showcase contemporary research and expert reviews on this topic. Our aim is to assemble a collection of high-impact articles that document technological advancements and, critically, their applications in clinical decision-making and their impact on patient outcomes. This Special Issue will highlight how novel echocardiographic techniques provide clinically relevant data across a wide spectrum of cardiovascular diseases. We look forward to receiving your submissions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
