Lupus and Scleroderma: New Aspects and Considerations

Message from the Guest Editors

Both systemic lupus erythematosus (SLE) and systemic sclerosis (scleroderma) (SSc) are autoimmune diseases that can result in substantial morbidity and mortality. Diagnosis and treatment for both are clinical challenges because patient presentation and response to therapy are heterogeneous. Despite the progress in treating organ involvement in SSc, however, effective treatments for cutaneous fibrosis remain elusive. None of the disease-modifying antirheumatic drugs have shown proven efficacy for SSc skin fibrosis, and it is challenging to carry out clinical trials because of SSc low prevalence, diverse clinical manifestations, and variable and fluctuating course. In this Special Issue, we will focus on emerging diagnostic tools or biomarkers, novel therapeutics and non-pharmacologic interventions, comorbidity management, and other challenging aspects of lupus and scleroderma. Keywords:

- lupus
- scleroderma
- autoimmune diseases
- interstitial lung disease
- biologics
- treat to target
- remission

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
