

Special Issue

Cardiac Arrhythmias in Autoimmune Diseases

Message from the Guest Editor

I have the great pleasure and honor to announce this Special Issue on “Cardiac Arrhythmias in Autoimmune Diseases”. For arrhythmic patients suffering from autoimmunological diseases, the dynamically developing novel pharmacotherapy of autoimmune disorders and augmented facilities for invasive cardiac electrophysiology are changing the landscape of therapeutic management. The reduction of the risk of cardiac fibrosis through contemporary rheumatological therapy might prevent the development of arrhythmia substrates. However, if arrhythmia does occur, there are many possibilities to treat dysrhythmia with advanced electrophysiological techniques. Special Issue on “Cardiac Arrhythmias in Autoimmune Diseases” will demonstrate contemporary research in this interesting field that requires a broad interdisciplinary perspective. Scientific papers containing evidence on actual arrhythmic problems of patients with autoimmune disorders, especially therapeutic solutions, are of the utmost interest. We are very much looking forward to receiving your original research and review articles.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
