

Special Issue

Acute Care and Medication Management in Older Adults

Message from the Guest Editors

This Special Issue of *JCM* offers teams with recognized expertise in the care of the elderly the opportunity to publish quality research work on acute care and/or drug management in this population. This Special Issue is open to varied topics in these two fields (acute care in older adults and medication management in older adults). Original articles on age-related atypical presentation, diagnostic tools, and the acute management of common conditions in older patients (including acute infections and acute cardiovascular disorders) are particularly welcome. In closing, in this issue, we challenge you to provide your best visionary science to help to advance the management of acute diseases in the elderly population.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
