

Special Issue

Portal Vein Thrombosis

Message from the Guest Editors

Portal vein thrombosis (PVT) can affect patients with or without liver cirrhosis. However, the two clinical settings, respectively PVT with or without cirrhosis, are very different in both background and management considerations. In fact, while in the absence of cirrhosis PVT frequently relies on underlying pro-thrombotic factors (and consequently the need of anticoagulation is obvious), in the context of cirrhosis PVT is considered to be secondary to liver disease, and it is controversial whether PVT is a cause or a consequence of impaired liver function. Consequently, the opportunity of treating PVT in cirrhosis is an open issue. Furthermore, the option of interventional treatment for both settings is a valid one. However, which cases to treat with medical or interventional treatment is still controversial. This Special Issue of the *Journal of Clinical Medicine* has the aim of investigating open issues about the etiology, pathophysiology, diagnosis, and management of PVT, both in cirrhosis and not.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
