Caenorhabditis elegans - A Developmental Genetic Model System

Guest Editor:

Prof. Dr. Morris F. Maduro

Department of Molecular, Cell and Systems Biology, University of California, Riverside, CA 92521, USA

Deadline for manuscript submissions:

closed (30 June 2019)

Message from the Guest Editor

Dear Colleagues,

Although C. elegans is a relatively new player in invertebrate development model systems compared with Drosophila, having been brought into the field by Sydney Brenner in the mid-1970s, it remains a valuable system for studies in developmental genetics. Owing to its rapid development, well-defined lineage and availability of a continually developing set of powerful tools, including single-cell transcriptomics, ability to identify mutations with whole genome sequencing, and custom gene editing with CRISPR/Cas9, discoveries continue to be made in C. elegans in many areas of developmental biology. This Special Issue of the Journal of Developmental Biology aims to highlight some of these findings and speculate on the future of work in this system. Submissions may be reviews o f C. elegans contributions to a major area in developmental genetics, or an original research article that reports new findings in such an area.

Message from the Editor-in-Chief

The Journal of Developmental Biology (JDB) publishes original research papers and timely reviews. Our primary aim is to provide a platform for the publication of studies on the development of multicellular organisms efficiently and professionally; papers undergo a fast, yet thorough, peer-review process. JDB is an open access journal and accepted contributions are published immediately online, providing unlimited access to the scientific community and general public. We look forward to receiving your contribution to our journal and to working with fellow researchers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2024).
