submissions:

closed (30 September 2019)

Message from the Guest Editor

Dear colleague,

The “Developmental Aging” special issue of the *Journal of Developmental Biology* publishes original research and timely review articles on all aspects of aging. The special issue aims to increase our knowledge of the molecular and cellular mechanisms underlying developmental aging and age-related dysfunctions.

In particular, this special issue mainly invites contributions that report on the following issues in aging:

- telomere erosion;
- epigenetic alterations;
- genomic instability;
- loss of proteostasis;
- deregulated metabolism;
- mitochondrial dysfunction;
- cellular senescence;
- impaired intercellular communication;
- impaired circadian clock; and
- stem cell

Message from the Editor-in-Chief

The *Journal of Developmental Biology* (JDB) publishes original research papers and timely reviews. Our primary aim is to provide a platform for the publication of studies on the development of multicellular organisms efficiently and professionally; papers undergo a fast, yet thorough, peer-review process. JDB is an open access journal and accepted contributions are published immediately online, providing unlimited access to the scientific community and general public. We look forward to receiving your contribution to our journal and to working with fellow researchers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2024).
