

## Special Issue

# Featured Papers for *Journal of Experimental and Theoretical Analyses (JETA)*

### Message from the Guest Editor

The intricate relationship between theory and experiment is the cornerstone of progress in engineering. At the *Journal of Experimental and Theoretical Analyses (JETA)*, we are committed to exploring these connections through rigorous and innovative research. This journal is a dedicated platform for presenting pioneering analyses that push the boundaries of what is possible in engineering. Our journal serves as a crucial nexus where theoretical insights meet experimental validation, advancing our understanding of complex engineering phenomena. The comprehensive exploration of these topics not only contributes to academic knowledge but also leads to practical applications that address real-world engineering challenges. We aim to foster a deep appreciation of the methodologies that make these discoveries possible. As Editor-in-Chief, I encourage submissions that reflect the journal's commitment to excellence in both theoretical and experimental analyses. I look forward to the invaluable insights that our contributors will share as we work together to expand the frontiers of engineering knowledge.

---

### Guest Editor

Prof. Dr. Marco Rossi

Department of Basic and Applied Sciences for Engineering, Sapienza University of Rome, Via A. Scarpa 16, 00185 Rome, Italy

---

### Deadline for manuscript submissions

31 December 2025

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### Rapid Publication:

first decisions in 18 days; acceptance to publication in 4 days (median values for MDPI journals in the second half of 2024).

#### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
