Prof. Dr. Marcin Zajenkowski

Faculty of Psychology, University of Warsaw, Stawki 5/7, 00-183 Warsaw, Poland

Deadline for manuscript submissions:

closed (31 May 2022)

Message from the Guest Editors

This Special Issue aims to address a wide range of topics examining the contribution of cognitive ability to intrapersonal processes (e.g., resilience, stability) and interpersonal interactions. This includes, but is not limited to, questions such as: Do cognitive abilities relate to interpersonal or emotional processes? Do lower cognitive abilities tend to relate to more interpersonal problems? Is intelligence related to socially moral reasoning? How do people with highly different levels of intelligence communicate with each other? And, do cognitive abilities affect strategies to maintain or restore well-being in difficult times? We also welcome empirical or theoretical papers that may challenge the role of intelligence in interpersonal or emotional processes.

We invite papers to the *Journal of Intelligence* testing theoretical models and empirical studies on intelligence and cognitive processes with:

- Social behavior, including social effectiveness, antisocial traits, and behavior (e.g. aggression, Dark Triad)
- Interpersonal relationships
- Emotional and motivational processes
- Well-being

Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

Journal Rank: JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q2 (*Education*)
