Message from the Guest Editors

Dear Colleagues,

According to a recent report by the Intergovernmental Science-Policy platform on biodiversity and ecosystem services, one in five people in the world depend on wild species for sustenance and income, with fisheries being the main source of food from wild species. Thus, the conservation of these resources through their sustainable management is more important than ever to achieve the UN Sustainable Development Goals. We welcome research papers, reviews, and contributions on various aspects of marine fish biodiversity, including, but not limited to, the following:

- Taxonomy and systematics;
- Distribution patterns;
- Conservation and management;
- Adaptations and behavior;
- Genetic diversity;
- Climate change impacts;
- Anthropogenic threats.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
