Message from the Guest Editor

Dear Colleagues,

This Special Issue that we are presenting to you deals with a highly topical and future-oriented issue in the maritime port world. The evolution of ports will be based, in the coming years, on the development of sustainability, especially environmental sustainability, energy efficiency, and digitalisation. In this way, ports will be the main actors for the development of the global and national economy. However, this new horizon presents a series of important challenges in which port and maritime management will be key in the future, and where the management of port infrastructures is fundamental.

For all these reasons, I encourage you to submit a contribution to this Special Issue, which I am convinced will be very successful and well received.

Prof. Dr. Alberto Camarero Orive

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
