

Marine Biodiversity and Ecophysiology under Changing Marine Habitats

Guest Editors:

Prof. Dr. Genuario Belmonte

Laboratory of Zoogeography and Fauna, DiSTeBA (Department of Biological and Environmental Sciences and Technologies), University of Salento, Campus Ecotekne, 73100 Lecce, Italy

Dr. Maria Giulia Lionetto

Department of Biological and Environmental Sciences and Technologies, University of Salento, 73100 Lecce, Italy

Deadline for manuscript submissions:

25 January 2025

Message from the Guest Editors

Marine biodiversity is correlated with the health and stability of marine habitats. Biodiversity is significantly impacted by variations in environmental conditions, whether due to natural processes or anthropogenic activities. Addressing the challenges posed by changing marine habitats requires a comprehensive and integrated approach to preserve their rich biodiversity. Apart from the recognition of how many life strategies (the biodiversity) can co-exist in the same habitat and the complex frame in which this goal can be realized, a clarifying contribution comes from ecophysiology, which focuses on the acclimation and responses of organisms to their natural habitats, particularly how they adapt, survive, and maintain their ecological roles in the present dynamic scenario. Ecophysiology elucidates the mechanisms behind diversity in marine environments, referring to the variations in physiological traits and functions at intra- and inter-species levels, as well as across different ecosystems, as a key component of biodiversity, underpinning ecological interactions and ecosystem functions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
