Message from the Guest Editors

Dear Colleagues,

Small-scale fisheries (SSFs) are traditional fisheries that employ fishing families and relatively small vessels. These fisheries are important for social and cultural reasons, as well as because they provide millions of small-scale fishers and local communities worldwide with livelihood and food security. Despite this, SSFs are often understudied, which poses severe challenges for both assessments of the level of their effects on exploited stocks and the development of practical recommendations for their sustainable exploitation.

We are pleased to invite you to share your research in the Special Issue “Small-Scale Fisheries and Living Resources Assessment and Management”. This Special Issue aims to explore the recent advances in fishery biology, ecology, and stock assessment, and discuss how these contribute to small-scale fisheries management. In this Special Issue, original research articles and reviews are welcome.

We look forward to receiving your contributions.

Dr. Régis Santos

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
