Deadline for manuscript  
submissions:

**closed (5 May 2023)**

### Message from the Guest Editors

The estuary is an ecosystem with a complex structure and unique function, which is the intersection of freshwater and seawater and an important fishery production base. The fish populations living in estuaries have different ecological characteristics and adapt differently to environmental changes.

Studies of estuarine fish dynamics are widely carried out in estuarine fish ecology and the correlation analysis of fish and the environment has also increased considerably in recent years.

This Special Issue seeks to include high-quality papers that are directly related to the ecology of estuarine fisheries. Topics may include, but are not limited to:

- Fish composition and assemblage structure;
- Estuarine fish community dynamics;
- Estuarine fish niche;
- Life history of estuarine fish;
- Estuarine environmental characteristics;
- Estuarine fish interactions with the environment and other organisms;
- Native and invasive species;
- Estuarine nursery grounds;
- Status of estuarine fisheries;
- Human activity impact

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
