Message from the Guest Editors

Dear Colleagues,

The demand for ocean exploration down to the deep seafloor (e.g., ocean resource exploration and ocean observations) has promoted innovations in underwater technology. As most underwater vehicles are unable to operate on the seafloor and even have difficulty reaching there at current stage, subsea robotics are urgently required to be deployed and operate on the seafloor. The purpose of this Special Issue is to publish the most exciting research with respect to the design, control, optimization and implementation of subsea robotics, to provide a rapid turn-around time regarding reviewing and publishing, and to disseminate the articles freely for research, teaching, and reference purposes.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
