Deadline for manuscript  
submissions:

**closed (20 July 2019)**

### Message from the Guest Editors

The pace of research in coral reef resilience has steadily gained momentum. Attention was focused on reef degradation caused by over-exploitation and destructive harvesting methods during the latter half of the 1990s. It gradually shifted to how coral reefs would respond to a changing environment brought on by coastal urbanization and climate change pressures. Are coral reefs fragile or resilient to these constant but permanent changes and what are the implications for management strategies? Research at all levels from molecular to community and habitat responses, as well as spatially extensive and/or long-term monitoring data to detect and understand specific trends relevant to novel management approaches, will remain important. We encourage you to share your findings by contributing to this Special Issue "Coral Reef Resilience".

If ten or more articles are accepted for publication after the usual review process, a hard copy of the volume will be printed.

As indicated on the website, the Article Processing Charge (APC) for the Open Access publication will be 350 CHF (Swiss Francs). See here for available discounts: <http://www.mdpi.com/about/memberships>

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
