CSIC-IEO-COC—Centro
Oceanográfico de Canarias,
Santa Cruz de Tenerife, Spain

Deadline for manuscript
submissions:

25 September 2024

Message from the Guest Editors

Global change has been a topic of concern in recent decades. Oceans act as a buffer against climate change and global warming, but at the expense of the stability of the climate system and marine ecology. Changes such as sea level and circulation changes, melting ice shelves, ocean acidification and hypoxia, and food chain collapse either directly or indirectly affect marine fisheries and marine ecosystems on a global scale, on which, in addition, other synergistic driving forces related to human activity and its impacts act, such as invasive alien species, pollution, habitat use and overexploitation of resources.

In this situation, in order to apply effective measures to maintain fishery production and ecological balance, it is necessary to approach the problem from a holistic point of view. It is urgent to fill the gaps in scientific knowledge, implement new research methods, and retrieve longer historical series on the variability of populations, ecosystems, and the marine environment to achieve sustainable ecological and economic solutions.

an Open Access Journal by MDPI

Perth, WA 6009, Australia

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
