Message from the Guest Editor

This Special Issue aims to focus on compilation of current state-of-the-art and future perspectives in marine ecotoxicology of cyanobacteria, mainly with regard to:

- Diversity and ecology of marine cyanobacteria,
- Marine symbiotic cyanobacteria,
- Chemical diversity of marine cyanotoxins,
- Dynamics of cyanotoxins in marine organisms and their ecotoxicological impacts,
- Transfer of cyanotoxins in the marine food chain and associated threats to animal and human health,
- Laboratory, field, and modeling approaches to the above issues.

If ten or more articles are accepted for publication after the usual review process, a hard copy of the volume will be printed. Feel free to contact me or Ms. Estelle Fan (estelle.fan@mdpi.com) if you would like to make a contribution or have any questions

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
