

## Frontiers in Physical Oceanography

Guest Editors:

**Dr. Yan Du**

State Key Laboratory of Tropical  
Oceanography, South China Sea  
Institute of Oceanology, Chinese  
Academy of Sciences,  
Guangzhou 510301, China

**Prof. Dr. Zhiyou Jing**

State Key Laboratory of Tropical  
Oceanography (LTO), South  
China Sea Institute of  
Oceanology, Chinese Academy of  
Sciences, Guangzhou, China

Deadline for manuscript  
submissions:

**closed (5 May 2023)**

### Message from the Guest Editors

Physical oceanography focuses on describing and understanding the physical properties and dynamic processes of the oceans, including surface and internal waves, ocean circulation, air–sea interactions, mesoscale eddies, density fronts, submesoscale processes, turbulent mixing, etc. These dynamic processes and their interactions over a wide range of space and time scales sustainably contribute to the mass transport and energy cycle in the ocean, as well as their impacts on climate change, the marine ecological environment, and offshore engineering. Benefiting from the developments of observational and computing technologies, the understanding of physical processes and their climatic and ecological effects have achieved a great progress in the last several decades. Not limited to the aspects mentioned above, the Physical Oceanography Section of this JMSE welcomes the submission of papers on a wide range of topics associated with the latest advances in descriptive or dynamical oceanography, indicating new insights, problems, methods or products, etc. to this Special Issue.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Charitha Pattiaratchi**  
Oceans Graduate School and The  
UWA Oceans Institute, The  
University of Western Australia,

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
