Dr. Bas W. Borsje

Faculty of Engineering
Technology, University of
Twente, Enschede, The
Netherlands

Deadline for manuscript
submissions:

closed (30 September 2020)

Message from the Guest Editors

Worldwide, hard structures are used as flood protection measures. These structures are static and do not respond to changing boundary conditions, such as sea level rise and increasing storminess. Moreover, the energy released during extreme events is hardly dissipated, resulting in enormous losses and damage. Therefore, innovative and sustainable solutions for flood defense stability, both technical and societal, are called upon. These measures allow for economic growth in coastal and deltaic regions, which are the world's most valuable areas.

In this Special Issue "Resilient Flood Defenses" we invite authors to submit papers that focus on process-based understanding of flood defense systems, as well as the effectiveness of solutions for flood risk reduction. Especially, topics related to nature-based solutions, climate change effects, and related management solutions are encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
