Deadline for manuscript  
submissions:

**closed (15 November 2023)**

### Message from the Guest Editors

Dear Colleagues,

Marine plankton, comprising diverse groups of microscopic organisms, are vital components of marine ecosystems and play a pivotal role in global biogeochemical cycles. This Special Issue aims to provide scientists with a platform to publish their cutting-edge research on monitoring and studying marine plankton.

One key aspect addressed in this Special Issue is developing and applying state-of-the-art techniques and technologies for plankton monitoring. Scientists are encouraged to present their research utilizing remote sensing, molecular techniques, high-throughput sequencing, and automated imaging systems. Moreover, this Special Issue explores the impacts of climate change, pollution, and anthropogenic activities on plankton communities. Additionally, studies addressing pollution events such as oil spills and harmful algal blooms, which pose severe threats to the health and diversity of plankton communities, are particularly encouraged.

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
