Message from the Guest Editors

Dear Colleagues,

In the last decade, with the rapid development and successful application of computational fluid dynamics (CFD), experimental fluid dynamics (CFD), and machine learning (ML) techniques in ship hydrodynamics, incredible—even breakthrough—progresses have been achieved in the prediction and assessment of ship hydrodynamic performances in calm water and in waves. This Special Issue intends to publish the latest progresses and achievements in research regarding the hydrodynamic analysis of ship performances through the use of methods, and their combinations, based on CFD, EFD, and ML techniques. We invite papers concerning topics including, but not limited to, the following:

- Resistance and propulsion in calm water and in waves;
- Motion and derived responses in waves;
- Maneuvering in calm water and in waves;
- Intact stability and damaged stability in waves;
- Ship hydrodynamics in restricted waters;
- Scale effects and full-scale ship hydrodynamics;
- Performance prediction and analysis with combined CFD/EFD, CFD/AI, etc.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
