Universitário de Santiago, 3810-  
193 Aveiro, Portugal

Deadline for manuscript  
submissions:

**closed (30 May 2023)**

### Message from the Guest Editor

This Special Issue will gather and share new results, best practices, successes, lessons learned, and general insights that contribute to the sustainable use of aquaculture activities, as well as ensuring the capability and viability of aquaculture activities for effective climate change related planning and management. Research articles, review articles, and case studies are welcome. Contributions should focus on aquaculture adaptation and mitigation measures, identification of the preferential sites to ensure aquaculture expansion and proper operation in a sustainable manner and with minimal environmental impact under optimal hydrodynamic and water quality conditions, planning and management of aquaculture approaches, present and projected climate-driven variations in water properties, and climate change effects on the aquaculture production of the main fertile regions.

## Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
