Message from the Guest Editors

Dear Colleagues,

Offshore wind farms have been developed and commercialized through pilot projects since 1990. Support structures of offshore wind turbines have highly dynamic behaviours, combining wind and hydrodynamic loading and complex dynamic behaviour from the wind turbine. It is important to capture the coupled effect of the wind and wave loads and the wind turbine system. The current Special Issue will focus on the analysis and design of support structures incorporating all turbine loads as well as the offshore environmental loads and soil. All theoretical, numerical, and experimental methods can be published for the proper design of support structure on topics based on the keywords. Furthermore, an overview of the different types of structures and how they are fabricated and installed could be published as part of this Special Issue.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
