Deadline for manuscript  
submissions:

**closed (15 April 2021)**

### **Message from the Guest Editors**

Dear Colleagues,

Offshore wind farms have been developed and commercialized through pilot projects since 1990. Support structures of offshore wind turbines have highly dynamic behaviours, combining wind and hydrodynamic loading and complex dynamic behaviour from the wind turbine. It is important to capture the coupled effect of the wind and wave loads and the wind turbine system. The current Special Issue will focus on the analysis and design of support structures incorporating all turbine loads as well as the offshore environmental loads and soil. All theoretical, numerical, and experimental methods can be published for the proper design of support structure on topics based on the keywords. Furthermore, an overview of the different types of structures and how they are fabricated and installed could be published as part of this Special Issue.

## Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
