Department of Mechanical,  
Energy and Management  
Engineering, University of  
Calabria, Cosenza, Italy

Deadline for manuscript  
submissions:

**closed (5 October 2021)**

### Message from the Guest Editor

In recent years, much attention has been paid to renewable energies, particularly marine resources, which have huge potential but are, at present, exploited only to a small degree. The *Journal of Marine Science and Engineering* is delighted to announce a timely Special Issue on “Offshore and Onshore Marine Renewable Energies”, with the aim of addressing topics related to stand-alone marine installations or arrays of marine installations. The Special Issue intends to cover, but will not be limited to, the following topics:

- wave and tidal resource assessment and characterization;
- tidal current modeling;
- the design of novel wave and tidal energy converters;
- the design of blades for marine machines;
- hydrodynamic and electrical components for wave and tidal machines;
- integration of control and power systems for wave and tidal arrays; and
- hybrid wave, tidal, and offshore wind arrays.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
