Message from the Guest Editors

Dear Colleagues,

The *Journal of Marine Science and Engineering* is about to launch a Special Issue dedicated to Responses of Coral Reefs to Climate Change. Coral reefs have immense biological wealth and provide economic and environmental services (e.g., tourism, fisheries, wave protection) for millions of people; however, reefs throughout the world are undergoing significant ecological change due to climate change. This Special Issue will focus on understanding the impacts of climate changes on corals and coral reefs. We welcome topics that cover climate change impacts on the ecology, physiology, and biodiversity of coral reefs. We also welcome articles focused on mitigation strategies, applied research, and adaptive research, as well as socioeconomic linkages between humans and coral reefs.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
