Message from the Guest Editors

Dear Colleagues,

The *Journal of Marine Science and Engineering* is about to launch a Special Issue dedicated to Responses of Coral Reefs to Climate Change. Coral reefs have immense biological wealth and provide economic and environmental services (e.g., tourism, fisheries, wave protection) for millions of people; however, reefs throughout the world are undergoing significant ecological change due to climate change. This Special Issue will focus on understanding the impacts of climate changes on corals and coral reefs. We welcome topics that cover climate change impacts on the ecology, physiology, and biodiversity of coral reefs. We also welcome articles focused on mitigation strategies, applied research, and adaptive research, as well as socioeconomic linkages between humans and coral reefs.

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
