### Message from the Guest Editor

Dear Colleagues,

The definition and adoption of measures for the sustainable management of fish stocks has become a priority worldwide due to the exploitation status of fish stocks. The stock status of a number of selected fish species is expected to be evaluated by expert working groups according to the specific requests of the country, mainly related to the economic importance of each stock. Although the use of single species stock assessment models is currently the most widely adopted in various international contexts, in recent years, interest in multispecies and multitrophic models has grown considerably, especially in relation to the increased importance of assessing the health status of different ecosystems. In this context, it is considered very important for the Special Issue to identify a section that deals with multispecies fishery management models, trophic relationships of exploited species, ecosystem response to fishing pressure and other interacting drivers at multitrophic levels, and identification of key environmental factors driving species spatial distribution and habitat utilization.

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
