### Message from the Guest Editor

Fisheries and aquaculture are important sectors for food, welfare and the economy of many regions, as well as for the environmental state of seas and oceans. Both activities are currently at a time of critical analysis of their impacts and a debate on the necessary technical, commercial and management changes to ensure their sustainability. The objective of this Special Issue is to critically analyze the current situation of fisheries and aquaculture, as well as to address various debates and initiatives that are leading to significant innovations in both sectors. Critical analyses of the economic, social and environmental impacts of fisheries and aquaculture are welcome, as well as analyses that propose new alternative forms of management, production, diversification and marketing. We are looking for papers from any region of the world and from different methodologies to contribute novelties to the current debate on where fisheries and aquaculture are and where they should be heading.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
