Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editor

Dear Colleagues,

Microplastics have received worldwide attention in recent years due to their ubiquitous presence, trans-boundary pollution, and potential negative effects on living organisms, both in the ocean and on land. This Special Issue calls for papers focusing on recent research results on the analytical method, distribution, source, transfer, degradation, biotoxicity, simulation modeling, cleanup, and countermeasures of marine microplastics. Since microplastics can concentrate other pollutants, research on combined toxic effects of microplastics and their adsorbed pollutants are welcomed. As a non-negligible source of marine microplastics, wastewater research is encouraged. You may present your research on both micro- and nanosized plastics, and we highly encourage novel techniques.

It is my pleasure to invite you to submit to this Special Issue on Marine Microplastic research. I sincerely hope the published papers will facilitate better knowledge sharing and build stronger collaborations.

Dr. Chengjun Sun

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
