

Ocean Modelling in Support of Operational Ocean and Coastal Services

Guest Editor:

Dr. Marcos G. Sotillo
Nologin, 28046 Madrid, Spain

Deadline for manuscript
submissions:

closed (15 December 2021)

Message from the Guest Editor

Operational oceanography is maturing rapidly. Its related capabilities are being noticeably enhanced in response to a growing demand of regularly-updated ocean information. Today, a number of core forecasting and monitoring services, focused on global and regional scales, are well-established. Sustained availability of their products has favored the proliferation of downstream services devoted to coastal monitoring and forecasting. Ocean models are a key component in operational oceanographic systems and ocean modeling progresses are a driver of service evolution.

The goal of this Special Issue is to publish most exciting research on ocean modeling with benefits in model applications that support existing operational oceanographic services. High-quality papers focused on combining ocean models with observational products, including data assimilation, are considered. Papers addressing model product quality assessments and evaluations of operational services capabilities to simulate outstanding marine processes/features and extreme events are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
