Message from the Guest Editors

Dear Colleagues,

There have been tremendous developments in offshore wind energy during the past ten years. As a key component, offshore wind turbine foundation, either bottom-fixed or floating, plays a critical role in the dynamics and stability of the whole system. Therefore, there is a large ambition to develop various kinds of foundation technology. This Special Issue focuses on various foundation design, analysis, model tests, installation, and also economic issues.

Dr. Puyang Zhang

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
