Architecture & Ocean
Engineering, College of
Engineering, Inha University,
Incheon 22212, Republic of Korea

Deadline for manuscript
submissions:

closed (1 March 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the Marine Applications of Computational Fluid Dynamics with a specific emphasis on the applications of naval architecture, ocean, and marine engineering. CFD is an emerging area and is gaining popularity due to the availability of ever-increasing computational power. If used accurately, CFD methods may overcome the limitations of experimental and other numerical methods, in some respects.

We invite researchers from both academia and industry to submit original articles that advance state-of-the-art marine applications of computational fluid dynamics or review the progress and future directions of research in this field. The scope of this Special Issue covers the range of subjects relevant to naval architecture, ocean, and marine engineering. The applications will include ships, oil and gas platforms, and marine and offshore renewable energy structures.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (*Civil and Structural Engineering*)
