

Special Issue

Recent Advances in Marine Mammal Research in Indo-Pacific Area

Message from the Guest Editor

This Special Issue focuses on marine mammals in the Indo-Pacific area to investigate various aspects of charismatic and ecologically important megafauna. While marine mammals are recognized as flagship animals of the aquatic biodiversity and the main target of the marine research and conservation effort worldwide, research and conservation concerns on marine mammals in the Indo-Pacific area are relatively lesser. The recent focus and advances in marine science in the Indo-Pacific area have led to a greater understanding of the interactions of megafauna, such as the marine mammals, with their physical and chemical marine environment and the role of these interactions in shaping the species diversity, environmental adaptation, molecular evolution, habitat use, distribution and movement/migration pattern, population dynamics, and behavior of these animals. We invite researchers to submit articles that advance the understanding of marine mammals in the Indo-Pacific area.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Oceanography) / CiteScore - Q1 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026).
