Monitoring and Assessment of Marine Environmental Pressures

Message from the Guest Editor

The ocean is vital to life on Earth. The many ecosystem services that it provides, related to provisioning, regulating, supporting, and cultural aspects, are also fundamental to the Blue Economy. It is imperative that relevant monitoring and assessments of the ocean, connecting human activities with pressures on marine ecosystems, are prioritised. As the seas become busier, there is a need for marine planning to optimise the benefits of the sea while ensuring that these benefits will be available to future generations. Fundamental to all this is the delivery of the correct monitoring and assessments that identify the main pressures, can detect environmental change, and ensure that the cause of the environmental change can be characterised, as well as showing whether or not the actions taken have delivered the desired outcomes. Research articles, review articles, and case studies are welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Oceanography) / CiteScore - Q1 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
