Pharmaceuticals as Emerging Contaminants in Estuary Environment

Message from the Guest Editors

The use of pharmaceuticals is on the rise worldwide. The large use of these emerging contaminants in breeding and aquaculture causes frequent detection at low but biologically relevant levels, posing a growing risk to marine species and ecosystems. Studies on the impact of Ps in the coastal environment are reported at a limited scale since most regard freshwater organisms and subcellular/cellular effects, with far fewer studies examining organismal and community-level effects. Most studies in marine waters and sediments regard Ps levels ignoring biological exposure and providing scenarios in time with poor consideration of abiotic factors, which affect the degradation or metabolism of compounds into other forms. The aim of this Special Issue is to publish the most exciting research with respect to the above subject and to give a rapid tool for the free publication and dissemination of the articles. The following topics are suggested: innovative methods for the characterization and quantification of Ps in water bodies and marine organisms; the impact of Ps on living marine organisms and on microbial resistance; methods for elimination/reduction of their harmfulness.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
