Special Issue

Nanotheranostics and Artificial Intelligence to Combat the COVID-19 Pandemic

Message from the Guest Editors

Taking challenges, state-of-the-art technology, and demand into consideration, this Special Issue welcomes technical notes, reviews, or research articles focused on exploring AI, nanotheranostics, or both, to combat SARS-CoV-2 and manage the COVID-19 pandemic. We particularly welcome contributions that include, but are not limited to, the following topics and their application for addressing COVID-19's challenges:

- Nanosystems;
- Theragnostic approaches;
- Nanomedicine;
- Nano-assisted multi-functional approaches;
- Artificial Intelligence;
- Therapy development.
