Message from the Guest Editors

Trichoderma is a cosmopolitan genus comprising species with great biotechnological impacts in the production of proteins, elicitors, bioactive molecules, and biocontrol, promoting plant growth and systemic resistance. In addition, it is used to understand many cellular processes. In this regard, the 16th International Trichoderma-Gliocladium Workshop (TG2024) was held at Lincoln University, New Zealand, under the theme "Trichoderma in Action". There were five sessions as follows:

1. Ecology, biodiversity, and taxonomy.
2. Biology-omics, physiology, and biotechnical applications.
3. Interaction with other microbes and animals.
4. Interaction with plants.
5. Product development.

This Special Issue of the *Journal of Fungi* will include papers from these five sessions presented at TG2024.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
