Deadline for manuscript submissions:

closed (31 August 2023)

Message from the Guest Editor

The Special Issue entitled “New Insights into Medically Relevant Fungi” aims to present recent research on any aspect of fungal species that threaten human health. We currently have mycosis caused by well-known etiological agents, diseases caused by emerging fungal pathogens, and diseases associated with fungal species that were previously not recognized as a menace to human beings. Therefore, there is a constant need for new research in both basic and clinical aspects of these pathogens and the caused infections. Some of its focal points include but are not limited to the following:

1. Host–fungus interaction;
2. The search for virulence factors;
3. Fungal sensing by the host immunity;
4. Epidemiology of mycosis;
5. Diagnosis of fungal infections;
6. Use of antifungal drugs and development of new alternatives to control fungal diseases.

Reviews, original research, and communications will be welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
