Message from the Guest Editors

Dear Colleagues,

Fungal pathogens are responsible for a vast number of diseases in agriculture, horticulture, as well as floriculture. This has a great impact on the economics of developing and developed countries all over the world. Microscopic, metabolomic, and molecular biology methods allow for detailed investigations of plant–fungus interactions, putting a new light on different aspects on fungal pathogenesis. In this Special Issue, we welcome original and review papers from all research areas of plant diseases induced by fungi, including plant disease resistance and susceptibility, epidemiology and control of fungal pathogens, and fungal pathogenesis.

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
