submissions:

**closed (30 September 2022)**

### Message from the Guest Editor

This Special Issue will focus on the advances of emerging contaminants' role on the human cardiovascular system. The aim is to provide an integrative, novel, and transdisciplinary approach to evaluate actual human exposure to EDC and contribute to the prevention and treatment of CVD. The theme is multidisciplinary, so I invite you to submit original research and review articles on the following non-exhaustive list of topics:

- Environmental health;
- Risk assessment;
- Health impact assessment;
- Endocrine-disrupting chemicals;
- Cellular and molecular mechanistic;
- Electrophysiology studies;
- Molecular docking.
