Message from the Guest Editor

Dear Colleagues,

This is a Special Issue of high-quality papers in open access form by the Editorial Board Members, or those invited by the editorial office and the Editor-in-Chief.

This Special Issue is reserved for high-quality research papers (reviews, articles, and short communications or letters) dealing with new and emerging topics in the field of xenobiotics of international interest. Papers focusing on interactions with societal aspects of chemical and physical agents in emerging economies (for example, green industry/nanotechnology, circular economy, therapeutics, and mitigation of global warming) are also welcome. Papers could come from accepted papers in *Journal of Xenobiotics*.

Dr. François Gagné
Guest Editor
