# Personalized Medicine in Gynecology and Obstetrics

Guest Editors:

**Dr. Mădălin Marius Margan**
1. Department of Functional Sciences, Discipline of Public Health, Victor Babes University of Medicine and Pharmacy, 300041 Timisoara, Romania
2. Clinical Emergency County Hospital, Bd. Iosif Bulbuca nr. 10, 300736 Timisoara, Romania

**Dr. Florin Gorun**
Department of Obstetrics and Gynecology, Municipal Emergency Clinical Hospital, Timisoara, Romania

Deadline for manuscript submissions:
**25 February 2025**

## Message from the Guest Editors

The objective of this Special Issue is to compile research that advances clinical practice by tailoring medication administration methods and therapy approaches to the individual needs of patients.

We invite submissions of original research articles and review papers focused on techniques for early detection of genetic disorders, fetal risk assessment, and fetal health monitoring. Furthermore, we are open to exploring metagenomics and epigenetics, with an emphasis on how the microbiome and epigenetic changes affect treatment options and pregnancy outcomes. Pharmacogenomics, which adjusts drug regimens to genetic profiles for better efficacy and safety, is another topic of interest.

In addition, we are interested in research on personalized endocrine therapies in gynecological health, including the latest approaches for diagnosing and managing uterine fibroids and endometriosis. Other key topics include cancer risk assessment through genetic testing for evaluation and prevention and personalized fertility treatments. The critical importance of screening and preventive care, as well as the development of new diagnostic tools and techniques, round out our focus areas.

Special Issue

## Editor-in-Chief

**Prof. Dr. David Alan Rizzieri**
1. Novant Health Cancer Institute, Winston-Salem, NC 27103, USA
2. Division of Hematologic Malignancies and Cellular Therapy, Duke University, Durham, NC 27710, USA

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
