Deadline for manuscript
submissions:

10 February 2025

Message from the Guest Editors

It is undeniable that orthopaedic implant-associated infection is a devastating complication that poses major socioeconomic impacts on healthcare systems. On top of that, the complexity of orthopaedic infections and the implications of biofilm development have been widely recognized over the last decades. The aim of this Special Issue is to collect papers investigating prevention and bespoke treatment measures against biofilm-associated infections in orthopaedics. Innovative diagnostic modalities and personalized treatment strategies for device-associated infections in orthopaedics will be prioritised. All study designs are eligible for submission, including original papers, narrative reviews, systematic reviews with or without meta-analyses; therefore, we invite you to share your knowledge and experience in this field with the aim of improving clinical practice relating to orthopaedic infections.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
