Deadline for manuscript  
submissions:

**30 September 2026**

### Message from the Guest Editor

This Special Issue aims to encapsulate the cutting-edge research that represents the frontier of knowledge in the field of airway diseases. It is particularly focused on novel diagnostic techniques, therapeutic interventions, and prognostic assessment tools that have emerged in recent years. The scope of this issue extends to molecular biology, clinical trials, and patient-centered care approaches, aiming to cover a broad spectrum of topics that promise to redefine standards and improve clinical outcomes.

This Special Issue invites submissions from a diverse array of scholarly contributions. Desired articles include original research papers that introduce new findings, comprehensive review articles that provide in-depth insights into current knowledge, and case studies that explore innovative treatment applications. This call for papers emphasizes the importance of contributions that not only present scientific rigor but also propose practical implications for clinical practice, aiming to foster a richer understanding and enhanced therapeutic approaches in the treatment of airway diseases.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
