Deadline for manuscript
submissions:

25 January 2025

Message from the Guest Editors

This Special Issue is dedicated to the latest advancements in the surgical management of orthopedic trauma, including upper-limb injuries. As the field of orthopedic surgery continuously evolves, innovative surgical techniques and treatment modalities have been developed to enhance patient outcomes and recovery. This Special Issue aims to gather high-quality studies, including original research and reviews, exploring various surgical approaches to treating orthopedic trauma. We seek to cover a broad spectrum of topics, ranging from fracture fixation methods to soft-tissue repair, and address the potential complications associated with these treatments. Our goal is to provide a comprehensive resource that not only enriches the existing literature but also promotes the dissemination and exchange of knowledge within the scientific community. By doing so, we hope to advance the field of orthopedic trauma and improve clinical practices globally.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
