### Message from the Guest Editor

Dear Colleagues,

This Special Issue is dedicated to “Advances in Personalized Medicine for Cardiovascular Care”, focusing on the transformative role that personalized approaches can play in the diagnosis, management, and treatment of cardiovascular diseases. Conventional modalities including imaging techniques and pharmacotherapy continue to be invaluable; however, personalized medicine has introduced an unparalleled depth of patient-specific care. Groundbreaking technologies such as artificial intelligence, augmented reality, and digital twins are enabling clinicians to predict disease patterns, tailor treatments, and even simulate surgical outcomes before intervention. Moreover, advances in genomics are helping to identify individual predispositions to cardiovascular diseases, allowing for early, targeted interventions.

This Issue invites submissions that delve into both the traditional and Personalized approaches in cardiovascular medicine.

Dr. Sérgio Laranjo

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
