Department of Gynecology, Obstetrics and Reproductive Medicine, Saarland University Medical Center, Homburg, Germany

**Prof. Dr. Dimitrios G. Goulis**

Unit of Reproductive Endocrinology, 1st Department of Obstetrics and Gynecology, Medical School, Aristotle University of Thessaloniki, Thessaloniki, Greece

Deadline for manuscript submissions:

**closed (20 March 2025)**

### Message from the Guest Editors

Recent advancements in medical research and technology have significantly transformed the landscape of gynecology and obstetrics. Accurate non-invasive diagnostics for obstetric and gynecologic diseases, such as preeclampsia and endometriosis, enable the individualization of treatment plans. Furthermore, the recent identification of molecular profiles in endometrial cancer has paved new pathways in gynecologic oncology.

The integration of personalized medicine into obstetrics and gynecology promises to revolutionize patient care, offering tailored approaches. We encourage the submission of various article types, including original research, reviews, clinical trials, case studies, and commentaries that address the personalized approaches in prenatal care, reproductive endocrinology, benign gynecology, gynecologic oncology, and beyond.

We believe that this Special Issue will serve as a valuable resource for clinicians, researchers, and healthcare professionals dedicated to advancing women's health. By embracing personalized diagnosis and therapy, we can move closer to achieving optimal health outcomes for every patient.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
