2. Department of Geriatric  
Medicine, Division of  
Rheumatology AOUC &  
Scleroderma Unit, University of  
Florence, Florence, Italy

Deadline for manuscript  
submissions:

**closed (5 December 2023)**

### Message from the Guest Editors

In the past, rheumatism (from Greek *ῥευματίζομαι*, “to suffer from a flux”) was the umbrella term used when referring to any of the vast group of inflammatory disorders affecting joints, tendons, or muscles. Nowadays, it is known that under this quite obsolete term, about 200 different diseases are classified, each one with its pathogenesis, natural history, diagnostic work-up, and therapeutic strategy. Moreover, every patient suffering from a rheumatic disease has their own characteristics which can differ from those of someone else affected by the same illness. Finally, overlap syndromes are possible, making the rheumatologist’s work even more challenging. The scope of this Special Issue is to delineate the latest advances in terms of differential diagnosis, patients’ typification, and tailored therapy in the world of rheumatic diseases. With this aim, we are looking for both comprehensive reviews and original research articles from authors dedicated to academical and clinical rheumatology.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
